

St. Theresa Maintenance Department

In search of someone that may want to work on Saturday or Sunday each week or on a rotation schedule. This person should be interested in working in a variety of software systems that control our HVAC system, door access control system, lighting and sound systems. In addition an interested person would need to have some basic understanding of general maintenance of commercial property.

If interested please contact the church office at 713-869-3783 or e-mail e.benitez@sttheresa.cc.
